Total Compensation Paid to Employee	
Total Value to Employee	

*If Falling Creek Camp pays or has paid for a certification, it is **NOT** counted toward your weekly compensation, and the cost of your certification may be deducted from your pay if you do not fulfill your contract. If you pay for your certification, you may be eligible to receive compensation for that certification. To receive additional compensation due to your experience and training, you must provide proof of all certifications for it to be counted towards your weekly pay. All certifications must be current through September 1st of the current camp season for it to count towards additional compensation. Certification must be relevant to your position in order to receive compensation. Staff members must fulfill their obligations for the term outlined in their Seasonal Staff Contract to earn any additional pay or bonus incentives, otherwise you will only receive your base pay.

Note: Payroll is processed every two weeks based on pro-rata share of total compensation. This will be the first payroll period after they receive their social security number (usually the second payroll period and it would include any payroll periods in the past). To determine the paycheck amount, divide the "Total compensation paid to employee" by the number of remaining pay periods (after SSN is received).
