

SUMMER 2021 COVID-19 INFORMATION SHEET

Colvig Silver Camps (CSC) is working diligently with the State of Colorado, American Camp Association, CDC, and San Juan Basin Public Health to develop practices and protocols that follow current guidance and regulations set by the Colorado Department of Public Health and Environment (CDPHE). Some of these protocols are in place already, and some are still in development. We are excited about summer 2021 and intend to run our traditional overnight summer programs in a manner consistent with state and local guidance. This will require some changes to our typical operation, and with our mission as our guide, we are committed to finding CSC solutions to provide our usual summer of significance in the Red Creek Valley.

WHAT WE KNOW NOW: HEALTH AND SAFETY PLANS FOR SUMMER CAMP OPERATION

- CSC is developing its base operational plan with the utmost caution and the most stringent pandemic projections in mind. If pandemic conditions improve, we will scale back protocols as is practical, practicable, and approved by relevant agencies.
- CSC's communicable disease plan will begin with an approach that minimizes the community to outside influence while camp is in session. We will add pre- and post-camp quarantine periods and testing requirements, and layers of non-pharmaceutical interventions (NPIs) like the following: **mask-wearing, physical distancing, maximized time outside, smaller group sizes/cohorts, frequent hand washing and sanitation of high-contact surfaces, adjustments to serving of meals and camper drop-off.**

THE COVID-19 STATUS DIAL AND WHAT IT MEANS FOR RESIDENTIAL CAMP

- The guidance set by the Covid-19 Status Dial is reflected in Colorado *Public Health Order 20-36* and continues to be amended. We will continue to monitor the dial and the updates to the health order.
- CSC **can** operate with fewer restrictions in levels **Yellow, Blue, and Green.**
- CSC **may be able to** operate in levels **Orange and Red** with stricter capacity restrictions.
- CSC **cannot** operate in-person camp programs in level **Purple.**

WHAT CSC IS WORKING ON AND POSSIBLE DEVELOPMENTS TO CONSIDER

- CSC is currently developing and working with San Juan Basin Health Department to determine the exact protocol for a camper or staff member who tests positive for COVID-19. Our hope is that there would be a safe way to transport that camper home while minimizing the risk of transmission during travel. Our plan includes preparation and facility arrangements to isolate and care for symptomatic or positive community members if safe transport home is not possible.
- With testing reliability and availability improving, we are making arrangements for more frequent and even rapid testing to allow quick isolation and care for a positive camper or staff person.
- With the current roll-out of Covid-19 vaccines and recent confirmation by the Advisory Committee on Immunization Practices (ACIP) that camp staff fall in the *Phase 1b* category of vaccine eligibility along with other priority educators, we anticipate that many of our staff could be vaccinated before camp. We will highly encourage staff to get vaccinated and help them through the process as needed.

CSC will continue to monitor and evaluate the current situation concerning the COVID-19 Pandemic and develop and update our health and safety protocols per current guidance and under the advisement of healthcare professionals and our local health organizations.
